The BlueSpot Air Blow Gun is ideal for non-contact cleaning of items and should be used with a compressed air line. The trigger adjusts the flow rate and light metal alloy body allow one-handed use. The blow gun is supplied with a 3mm nozzle, the length is 100mm.

Specification

Air Inlet	1/4" BSP
Air Consumption	5.7CFM (161 L/min)
Recommended Working Pressure	50-90PSI
Maximum Working Pressure	145PSI (10 bar)
Maximum Operating Temperature	50°C
Minimum Operating Temperature	- 20°C
Nozzle	100mm x 3mm

Operation

NEVER direct the airflow at humans or animals as this can end in fatality due to air entering the bloodstream. Under no circumstances should you aim the air the gun at yourself, others or animals.

ALWAYS make sure the air supply is switched off whilst connecting to the air blow gun.

1. Connect the air hose to the gun inlet through the ¼" BSP connection.
2. Make sure the connection is secure.
3. Ensure the air supply is set at the correct pressure before beginning.
4. Switch on the air supply.
5. Pull the trigger to release the compressed air from the nozzle.
6. To adjust the pressure of the air blow gun release or pull the trigger.

Cleaning & Maintenance

ALWAYS ensure the air gun has been disconnected from the air supply and air pressure released before carrying out any cleaning or maintenance.

- Clean the machine body with a dry cloth.

Storage

Store the air blow gun in a cool dry area that is out of reach of children.

Disposal

Always check and adhere to national regulations when disposing of any tools that are no longer functional and cannot be repaired.

- Contact your local waste disposal authority for information on how to correctly dispose of tools.
